

County Medical Care Facility or Hospital Long Term Care Unit

Tips for Billing Oxygen – Revenue Code 0410

Oxygen gas, equipment, and supplies for intermittent and infrequent use are included in the facility's per diem rate.

If a beneficiary requires frequent or prolonged oxygen on a daily basis (i.e., at least 8 hours per day:

- Report Revenue code 0410
- Report quantity as 1
- Report all oxygen charges on one claim line for entire month
- **No separate NPI is required**

Notes:

As a resident in a County Medical Care Facility or a Hospital Long Term Care Unit, the oxygen, gas, equipment, and supplies must be billed by the facility. A DME provider cannot bill for oxygen gas, equipment, and supplies for these residents.

The rental of a concentrator (HCPCS Code E1390) **is** billable by a Medical Supplier and should not to be confused as needing to be billed under Revenue Code 0410.

If Medicare is being billed for the nursing facility stay, neither the nursing facility nor a medical supplier can bill Medicaid for oxygen services (i.e., gas, equipment, supplies). Oxygen services are included in the Medicare payment to the facility.
